 UPPER: 2,098 SF.
 BEDROOMS: 4
 BATHROOMS: 3.5

A classic exterior with a Northwest influence. The covered porch is a great place to enjoy a few leisure moments. The foyer feels good, inviting, and separates yet connects the dining and great room. The wine cellar is a visual treat, making the trek for the bottle of wine a privilege. The Great Room is just that – where 2 story ceilings and windows compliment the grand fireplace and built-ins. This superb kitchen is the family hub, whether at the island or the command center desk or the covered patio. Don't forget the short cut to the functional mudroom. The living quarters on the upper floor feature a gathering loft with generous bedrooms. The vaulted master suite has a fireplace for fun and a premier upscale bath and walk in closet with designer built-ins. The 'Not your normal laundry room' is on the bedroom floor. The bonus room is ready for fun and games with a built-in bar.
