

Muirfield

TOTAL LIVING: 3,479 SF.
 MAIN: 1,643 SF.
 UPPER: 1,836 SF.
 BEDROOMS: 4
 BATHROOMS: 2.5

The Muirfield blends unique Craftsman design and architectural detailing with flair. It is captivating. The living and dining room compliment each other with turn of the century millwork designs, yet live very 'today'. Retreat to the den through the french doors. Down to the trademark wine cellar or up to the living quarters, either path is a joy. The kitchen and nook are powerful and the well balanced ergonomics make it a place all will gather. The dining island is a unique feature and is the best view in the house to the family room surround big screen. The lavish built-ins also provide always needed storage. On your way to the media room take in the commanding views from the loft. The laundry room is replete with a desk and built-in laundry hampers. The spacious master suite radiates warmth (from the fireplace!) while his and hers walk-in closets solve issues. In the master bath, watch your favorite show on the flat screen from the Jacuzzi or just admire the view. The bath appointments and details are numerous – and what a shower!
